

POSITIVE **IMPACT** HEALTH CENTERS

At the Forefront of
Care and Prevention

2023
IMPACT
REPORT

Larry M. Lehman, President & CEO

Dear Friends and Colleagues,

The strength of Positive Impact Health Centers (PIHC) lies in bringing people together. By working as a team—across the state, country, and even the world—we’re providing high-quality care to those affected by HIV. **Together, we’re at the forefront of HIV care and prevention.**

We believe in putting patients first and using evidence-based methods to support them. This approach guides everything PIHC does. Our reputation for quality care has earned the trust of the HIV community, and we’re committed to being the change we want to see in the healthcare industry. **Prioritizing patient-centered care and fostering a culture of continuous improvement means we’re reaching higher standards of excellence.** Our unwavering dedication to compassionate, comprehensive care is at the forefront of our mission to help our patients create a life worth loving.

Lara Martin, Board Chairwoman

In 2023, we committed to engaging in meaningful dialogue with our staff, patients, and community partners which refined our approach to care delivery. The invaluable feedback also shaped our 2024–2026 Strategic Plan, a vital blueprint that is guiding PIHC to **reach an ambitious milestone of serving 15,000 patients** by the end of 2026.

Last year, PIHC made strides in empowering marginalized communities with the launch of the **POWER Program**. This pioneering initiative offers valuable training to individuals of transgender experience, equipping them with the skills and certifications to thrive as Medical Assistants and Phlebotomists. Furthering our commitment to excellence, 2023 witnessed our organization’s transformative partnership with **Project ECHO**, a groundbreaking program revolutionizing the way healthcare professionals collaborate and disseminate knowledge globally. Recognizing the ever-evolving educational needs of our dedicated staff, we also established the **PIHC Institute**, a resource center dedicated to nurturing professional development.

Together, we are the change. With your support and collaboration, PIHC will continue to reshape the future of HIV care and prevention.

Welcome
new members!

Long-acting Injectables

Positive Impact Health Centers offers both long-acting, injectable cabotegravir (a single injection every two months) for HIV prevention and CABENUVA™ (cabotegravir and rilpivirine) a two injection combination given either monthly or every 2 months for HIV treatment.

Positive Impact Health Centers offers both long-acting, injectable cabotegravir (a single injection every two months) for HIV prevention and CABENUVA™ (cabotegravir and rilpivirine), a two-injection combination (given either monthly or every two months) for HIV treatment.

Patients who come into the clinic for injections can avoid the inconvenience of a daily pill regimen and also benefit from the privacy that comes from not having to keep HIV medication at home.

**Helping patients to
Undetectable = Untransmittable**

Giving our patients *freedom* from daily pills.

HIV & Sexually Transmitted Infection Prevention

PIHC offers Sexually Transmitted Infection (STI) Prevention through individualized sexual health plans including STI education; condom utilization; and access to Doxy-PrEP & PEP for STIs and HIV PrEP & PEP.

A leader in prevention, PIHC is one of the first organizations to offer Doxy-PrEP and PEP in the prevention of Gonorrhea, Chlamydia and Syphilis. In combination with other preventive measures, this new public health tool can significantly decrease the chances of acquiring one of these STIs.

As always, PIHC offers STI treatment and care in a non-judgmental environment without the need for an outside referral.

Doxy-PrEP – a self-administered antibiotic (single pill) taken once daily.

Doxy-PEP – a self-administered antibiotic (two pills) taken within 72 hours of a sexual encounter.

Building the new standard of HIV & STI care.

87% of testing clients were referred to PrEP for HIV prevention

20% increase in PrEP patients during 2023

Recovery Innovation and Care

PIHC understands that the wellbeing of patients stems from a comprehensive approach and individualized plans—the basis of positive health journeys for every level of need. Our Recovery Team members are pioneers in Medication Assisted Treatment and Harm Reduction for those engaged in the criminal justice system, and our agency is one of the largest providers of Medication Assisted Treatment (MAT using Vivitrol) in the Metro Atlanta area. We also provide sexual safety kits and harm reduction bags that include Narcan to those enrolled in addiction services.

Naloxone (Narcan) Saves Lives

With the right tools, people can prevent deaths from overdose. Narcan, for example, is a lifesaving medication that can reverse an overdose from opioids including heroin, fentanyl, and prescription opioid medication, when administered in time.

**Giving the
community
the right
tools.**

In-house Hepatitis Care

Screen, Prevent, Treat, Cure.

PIHC offers hepatitis screening, treatment, and prevention education at all three of its clinical locations.

Hepatitis is an inflammation of the liver, often caused by a virus. In the United States, the most common types of viral Hepatitis are Hepatitis A, Hepatitis B, and Hepatitis C. Tens of thousands of people are newly infected with viral hepatitis every year in our country.

We offer screening and preventive services for Hepatitis A, B and C, including treatment for Hepatitis B, and oral therapy as a cure for Hepatitis C. These protocols allow patients to receive viral hepatitis care at PIHC without waiting for referrals to outside providers.

We create *healthy* spaces for our patients.

Full-Time Psychiatry

Suicide is the tenth leading cause of death in Georgia. At PIHC, our understanding of emotional wellness is tied to recognizing that people living with HIV die by suicide at a rate 100 times of the general population, and 82 percent of individuals of trans experience have contemplated suicide during their lifetimes.

Our organization doesn't stop at being the forefront of HIV care, which is why in 2023 we added a full-time psychiatrist to lead our existing psychiatric staff of nurse practitioners and part-time practitioners. The addition of full-time staff has increased the hours available for care and significantly reduced the wait time for psychiatric appointments from four weeks to one week.

**Shorter
wait
times.**

LGBTQ+ Youth Program

Positive Impact Health Centers actively collaborates with esteemed partners including Fenway, UCSF, and AIDS United to advance HIV care for LGBTQ+ youth aged 13 to 24—a group who requires assistance with transportation, housing, employment, and access to nutritious food to thrive. With the enrollment of more than 50 youths in this initiative, we continue to obtain training and provide support (for both youth and staff), fostering a collaborative environment and providing comprehensive care to achieve HIV viral suppression and improve overall health outcomes.

Improving HIV care through innovative approaches and responsiveness to the needs of the communities we serve.

POWER Program

The PIHC POWER program offers individuals of trans experience access to workforce training programs. Our agency funds the costs—\$10,500 per student—for these individuals to gain certification as a Medical Assistant and Phlebotomist. The funding covers tuition, laptops, bus passes to classes, scrubs, and exam fees. The average salary for a Medical Assistant is \$50,000 per year, so training candidates in both professions increases their marketability. Four individuals graduated from the program in 2023.

The goal is to increase an individual's financial resources through earned income and create an avenue to gain skills in professions with high job security and advancement opportunities.

As the healthcare industry is struggling to fill vacancies, PIHC is helping economically disadvantaged individuals vulnerable to HIV infection obtain workforce skills and fill healthcare professional shortages around the State of Georgia.

**Positive
Optimistic
Worthy
Educated
Resilient**

We are a patient's true medical *home.*

Project ECHO

The Project ECHO (Extension for Community Healthcare Outcomes) Model was founded by Dr. Sanjeev Arora at The University of New Mexico and is rooted in the philosophy of All Teach, All Learn. Participants from all backgrounds engage in a virtual community of learning and mentorship to share critical expertise, provide peer support and guidance as well as discuss cases and updated care standards for the community served.

This collective understanding and engagement work to disseminate information and implement best practices across diverse disciplines—improving patient outcomes, creating more health equity, and building strong healthcare systems and patient-centered care locally, domestically and abroad. The ECHO Model makes high-quality care available to everyone, and we are leading the way in the HIV ECHO community.

The PIHC ECHO program occurs the first and third Friday of each month. It starts with a 15 to 20 minute discussion on current topics in HIV and infectious diseases, followed by our ECHO community presenting real (anonymized) cases for discussion and recommendations.

The ECHO Model has been applied to all types of health conditions and educational systems, serving to advance gender equality throughout the world. ECHO Hubs are in 195 countries with more than four million participants each year. This continuous loop of learning is unique with a long-lasting impact for future generations of healthcare providers and their patients.

Dr. Gregory "Grey" Felzien
(they/them),
Co-Medical Director &
Project ECHO Team Lead

As the Co-Medical Director of PIHC, Dr. Felzien works in close collaboration with multiple local and national partners and is actively involved in the rural community, coordinating HIV awareness and education, as well as writing and speaking at the local, state, and national level.

Creating long-lasting impact for future generations.

121 patients received housing assistance

4,814 vaccines administered to **2,267** patients

115 clients received PEP services and follow-up visits

The Research and Development Institute

Last year, we brought new professional development opportunities for staff and the community, including the creation of our own Research and Development Institute, to advance PIHC research, effective system delivery and care, health equity, and advocacy. The Institute, headed by Michelle Allen, aims to support client-centered care by providing education and training in-house to staff and to healthcare and social service providers in the community. In addition, each new staff member attends all trainings as part of new employee on-boarding.

The Institute also is working with staff to prepare conference presentations and abstract submissions in order to share the innovation happening at PIHC. We know communicating our programmatic successes and findings helps other service delivery providers, researchers, and local, national and global experts. Being part of the research community helps us gain additional knowledge and connect with future collaborators and colleagues to reach our goal of 15,000 in care.

Michelle Allen,
PIHC's Institute Director

More *impact* than ever.

Increased training supports client-centered care.

2023 GRANT HIGHLIGHTS

AIDS VACCINE 200 HOPE FOR ALL

ACTION CYCLING ATLANTA
Benefiting the Emory Vaccine Center

The AIDS Vaccine 200 is an annual cycling event held in Georgia, dedicated to raising funds for HIV vaccine research at Emory and supporting HIV service organizations across the state. The dedicated cycling team at Positive Impact Health Centers undergoes months of rigorous training in preparation for this event, not only to conquer the miles but also to raise crucial funds for our agency's services. Over two days, participants can choose from three distinct routes: a challenging 100-mile, a scenic 60-mile, or a beginner-friendly 30-mile option, ensuring a diverse experience for riders of all levels. We take immense pride in our team of riders, whose efforts during the past eight years have collectively raised over \$160,000.

If you are interested in joining the team for 2025, contact Olivia Chelko, Director of Development and Communications, at Olivia.Chelko@pihcg.org.

The past eight years, our team has raised **more than \$160,000!**

community townhall

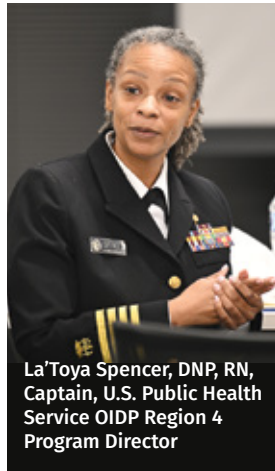

HIV Response in Metro Atlanta

On December 14, 2023, PIHC hosted an HIV Response in Atlanta Townhall with Captain Adeoye John Oguntomilade, EHE Coordination Lead, U.S. Department of Health and Human Services.

During the Townhall, overall progress, the future, and what needs to be done to strengthen and accelerate the HIV response in Metro Atlanta were discussed. More than 200 individuals attended the Townhall in-person, online and through Facebook Live, including staff from partner community-based organizations, HIV service agencies, local health departments, and federal colleagues from the Centers for Disease Control and Prevention, Health and Human Services, and the Health Resources and Services Administration.

Providing Expertise

PIHC partners with local healthcare providers, community groups, and government agencies to support HIV treatment/prevention programs and provide pharmacy operational and 340B expertise. We also help to establish sustainable revenue sources and advocate for equitable healthcare access. Our alliances are built on the shared goal of success for all involved. During the past few years, we assisted Cobb Douglas Public Health, Damien Center, and Matthew25 in operationalizing and maximizing their in-house pharmacies and establishing best practices.

David Magazine, Atlanta's premier LGBTQ+ publication, is dedicated to celebrating and uplifting the LGBTQ+ community through compelling storytelling, vibrant visuals, and insightful journalism. Deeply committed to advancing the vital mission of PIHC, the publication stands in solidarity with our organization by providing in-kind donations of advertising, event promotion, and the showcasing PHIC programs and initiatives through editorial features.

 The logo for David Magazine, featuring the word "DAVID" in a large, white, serif font above the word "MAGAZINE" in a smaller, white, sans-serif font, all set against a red square background.

Community Recovery Center

Positive Impact Health Centers partners with a number of recovery housing nonprofits throughout metro Atlanta, including our alliance with the Community Recovery Center, an organization making strong strides in improving the quality of lives of those affected by the opioid crisis in North Georgia. To illustrate, the Center's all-female sober living center links residents with employment and medical and emotional health resources. The organization also remains invested in the well-being of their residents, ensuring that they attend both a 12-step recovery program and utilize the Medication Assistance Treatment recovery program at PIHC. Together, we are changing lives.

We partner with our *community.*

Creative Coping Skills IMPACT Group

Our Creative Coping Skills IMPACT group participants painted rocks with words, symbols, and phrases grounding them in their recovery paths. The stones, placed at the entrance door, are daily inspirational reminders of treatment success.

a legacy of caring

We honor the life and work of **Dr. Christopher Allers**, a leader whose brilliance and dedication illuminated the HIV community. His exceptional work ethic and passion for serving others set him apart, inspiring all who knew him. Through his mentorship, he empowered countless individuals to grow and thrive. Dr. Allers was one of the founders of Positive Impact Health Centers, a beacon of hope for those affected by HIV. Though he is no longer with us, his legacy of compassion and integrity lives on. We pledge to carry forward his vision and continue the work he started. In memory of Dr. Allers, you can contribute to the Dr. Chris Allers Emotional Wellness Fund to support his legacy of caring for the emotional well-being and counseling programs for persons with HIV.

CONTRIBUTE TO THE
**Dr. Chris Allers Emotional
Wellness Fund** AND
SUPPORT HIS LEGACY.

Your donation has **IMPACT** and will help PIHC reach 15,000 patients in care. Every amount helps!

\$15 pays for 30 days of the most common psychiatric medication. **\$75** provides one HIV test and a counseling session. **\$125** provides translation services during a medical or case management visit for a client whose native language is not English.

\$500 covers a year of STI screenings for one patient on PrEP. **\$3,000** provides one month of Antiretroviral Treatment (ART) medication for one client.

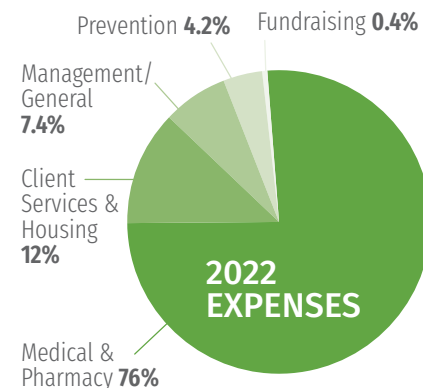

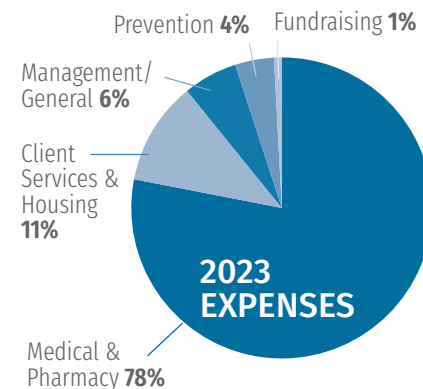

Our financials report on a calendar year and reflect a 12-month operating year from January 1–December 31, 2023.

90%

Both years, **90% or more** of every dollar went directly to program (client-related) services.

*Change in net assets \$1,502,000

Reimagining outreach

ATL Greek Picnic
Morris Brown College

As a proud sponsor of the 2023 Atlanta Greek Picnic, Positive Impact Health Centers provided attendees HIV testing, health education, condoms and PrEP enrollment information. Our agency was the only on-site provider of the PrEP service, and this new initiative will be featured in several conferences in 2024.

PIHC strives to remove the stigma of HIV and increase outreach through collaborative efforts, along with new, innovative, and non-traditional partnerships. Atlanta serves as our country's public health capital and also is home to four, widely known and highly regarded Historically Black Colleges and Universities (HBCUs): Clark Atlanta University, Morris Brown College, Morehouse College, and Spelman College.

71 tested for HIV at the event and 45 at-home HIV testing kits distributed.

Join Team PIHC!

Lace up your walking or running shoes and join us for a 5K walk/run and music festival to support Positive Impact Health Centers.

Your participation will make a significant impact in raising funds to support the work. Together, we can help continue providing essential care and services.
